Dayton Superior Introduces New Ferrule Anchors in Australian Construction Market

Dayton, Ohio March 16, 2015 – Dayton Superior Corporation, the leader in providing engineered product solutions for the nonresidential concrete construction market, is introducing a Hex Head Ferrule Anchor and Straight Ferrule Anchor developed exclusively for the Australian concrete construction market.

Dayton Superior's new Hex Head and Straight Ferrule Anchors are used in tilt up construction applications for structural connections, panel-to-panel connections and tilt up brace attachments. Both anchors can be used with plastic antenna caps and ferrule nail plugs, also engineered specifically for the Australian market. The plastic antenna caps allow ferrule anchors to be easily located, while the nail plugs allow the ferrules to be attached to wood formwork.

"The Australian tilt up construction market continues to grow as contractors are using the tilt up method more frequently, said Estella Matemu, Dayton Superior Product Manager. "Dayton Superior created the Hex Head and Straight Ferrule Anchors to meet The Australian Standard™ requirements for tilt up construction. The addition of these products further enhances Dayton Superior's ability to serve our customers as a single-source solutions provider in the tilt up industry."

###

ABOUT DAYTON SUPERIOR CORPORATION

Dayton Superior is a leading provider of accessories, chemicals, forming and paving product solutions to the nonresidential concrete construction industry. Their portfolio includes over 17,000 standard, in-stock items, a network of 15 distribution centers and 13 U.S. manufacturing facilities allowing Dayton Superior to serve their customers as a single source provider of high quality products and services for over 90 years. Dayton Superior products are found on infrastructure, institutional and commercial construction projects across the world. With the 2014 opening of their Innovation Center, Dayton Superior will assess, evaluate, prototype and launch new products at an industry leading pace to transform industry productivity through innovation and create a competitive edge for their customers.
