DAYTON SUPERIOR INTRODUCES NEW BAR SUPPORT PRODUCTS

DAYTON, Ohio, June 26, 2014 – Dayton Superior is introducing two products to their bar support product portfolio. The first, ReBoot™, provides high-strength reinforcement for vertical rebar in concrete foundations. The BarTender™, also utilized in concrete foundations, guides and aligns reinforced rebar to meet crucial spacing requirements. Both products are specifically engineered to provide greater rebar compatibility, higher strength and easy installation for subterranean applications where positioning fabricated structural cages within the American Concrete Institute's (ACI) tolerances for concrete cover is needed.

The ReBoot and BarTender exceed all requirements for in-the-field, below-grade, structural alignment requisites. Product features of each include:

ReBoot

- 2000 lb. Compression Rating
- #6 - #18 Rebar Compatibility
- Rigid Rebar Attachment

BarTender

- 500 lb. Compression Rating
- #3 - #7 Rebar Compatibility
- Positive, Unibody Lock

In addition to these features, these products offer 20% more rebar compatibility than previously available in the market and can be installed without the use of tools, allowing contractors to maximize labor productivity on the jobsite.

“The ReBoot and BarTender have been tested and proven to exceed capabilities of existing technologies,” said Josh Ison, Product Manager with Dayton Superior. “Furthermore, these products are injected and manufactured in the USA, making them fully compliant with the Buy American Act.”

###

ABOUT DAYTON SUPERIOR CORPORATION

Dayton Superior is celebrating 90 years as a leading provider of accessories, chemicals, forming and paving product solutions to the nonresidential concrete construction industry. Their portfolio includes over 17,000 standard, in-stock items, a network of 15 distribution centers and 13 manufacturing facilities allowing Dayton Superior to serve their customers as a single source provider of high quality products and services. Dayton Superior products are found on infrastructure, institutional and commercial construction projects across the world. With the 2014 opening of their Innovation Center, Dayton Superior will assess, evaluate, prototype and launch new products at an industry leading pace to transform industry productivity through innovation and create a competitive edge for their customers.
